

DRR in Education

Introduction to the Comprehensive School Safety (CSS) Framework

21 October 2016
Berne

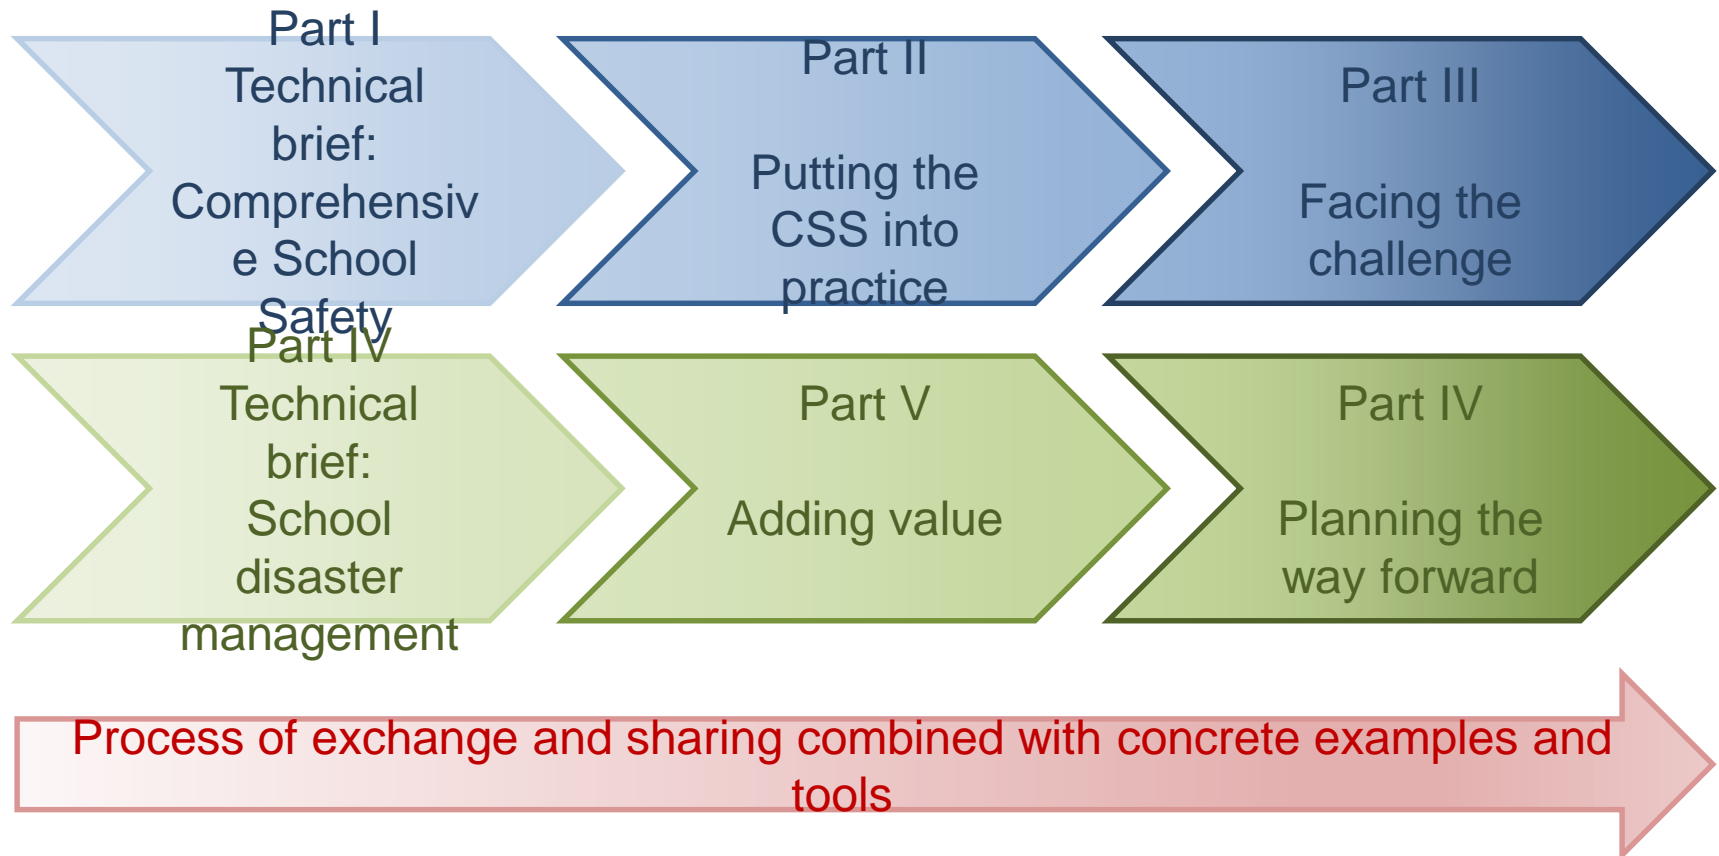

Expected results

Participants ...

- will have an increased understanding of the CSS Framework and the need to include DRR in schools for a comprehensive DRM approach at the community level.
- will have an increased awareness on good practices and lessons learned on education programmes (including those applying the CSS Framework); and will explore how these approaches can be tailored for their specific needs.
- will be inspired for future education programme development adapting the risk / DRR lens.

Programme

Presentation participants

- Personal information (name, organisation, function)
- Experience in the field of DRR in education
- What are your and your institution's main challenges or questions with regard to DRR in education?

Vision

*Network of NGO professionals,
dedicated to increase the resilience of women and men,
communities and governments,
