

WEBINAR

The IPCC AR 6 – WG II – Impacts, Vulnerability and Adaptation

Translating its findings for development and humanitarian practitioners

22 March, 2022, 12:15 – 1:45pm (CET)

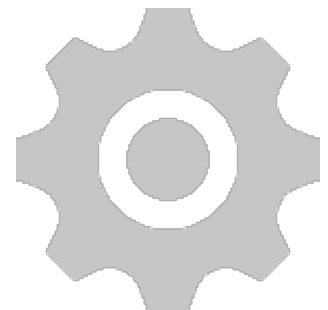

Technical tips

Your microphone is muted by default.

Please post your questions directly into the chat, we will address them during the Q&A sessions

If you can't hear or see: close and restart webinar, and close other programs.

This webinar is being recorded and will be shared via www.drrplatform.org

Please have your mobile phone at hand. In the course of the webinar, we will work with www.menti.com

Programme: Webinar IPCC

Agenda	Speaker
Welcome and Introduction	Jana Junghardt, HELVETAS
Key messages of the report	Prof. Dr. Christian Huggel, University of Zurich
Q&A	
Deep-dive into the cross-chapter paper on mountains	Dr. Carolina Adler, MRI Dr. Veruska Muccione, University of Zurich
Interaction & Q&A	
Cancelled: Climate-resilient development pathways	Rupa Mukerji, HELVETAS
Closing	Jana Junghardt, HELVETAS

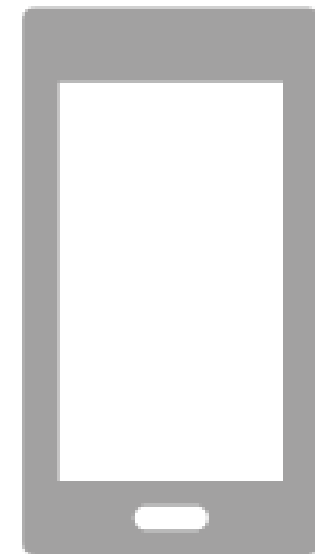

The Swiss NGO DRR Platform

- **Network** of 20 Swiss-based NGOs
- “Dedicated to **increase the resilience** of women and men, communities and governments through DRR and CCA”
- **3 pillars:** Capacity building and exchange, tool and concept development, policy dialogue and advocacy
- **Partners:** Swiss and international
- **Website:** www.drrplatform.org

What should be the priorities for effective adaptation?

What should be the priorities for effective adaptation?

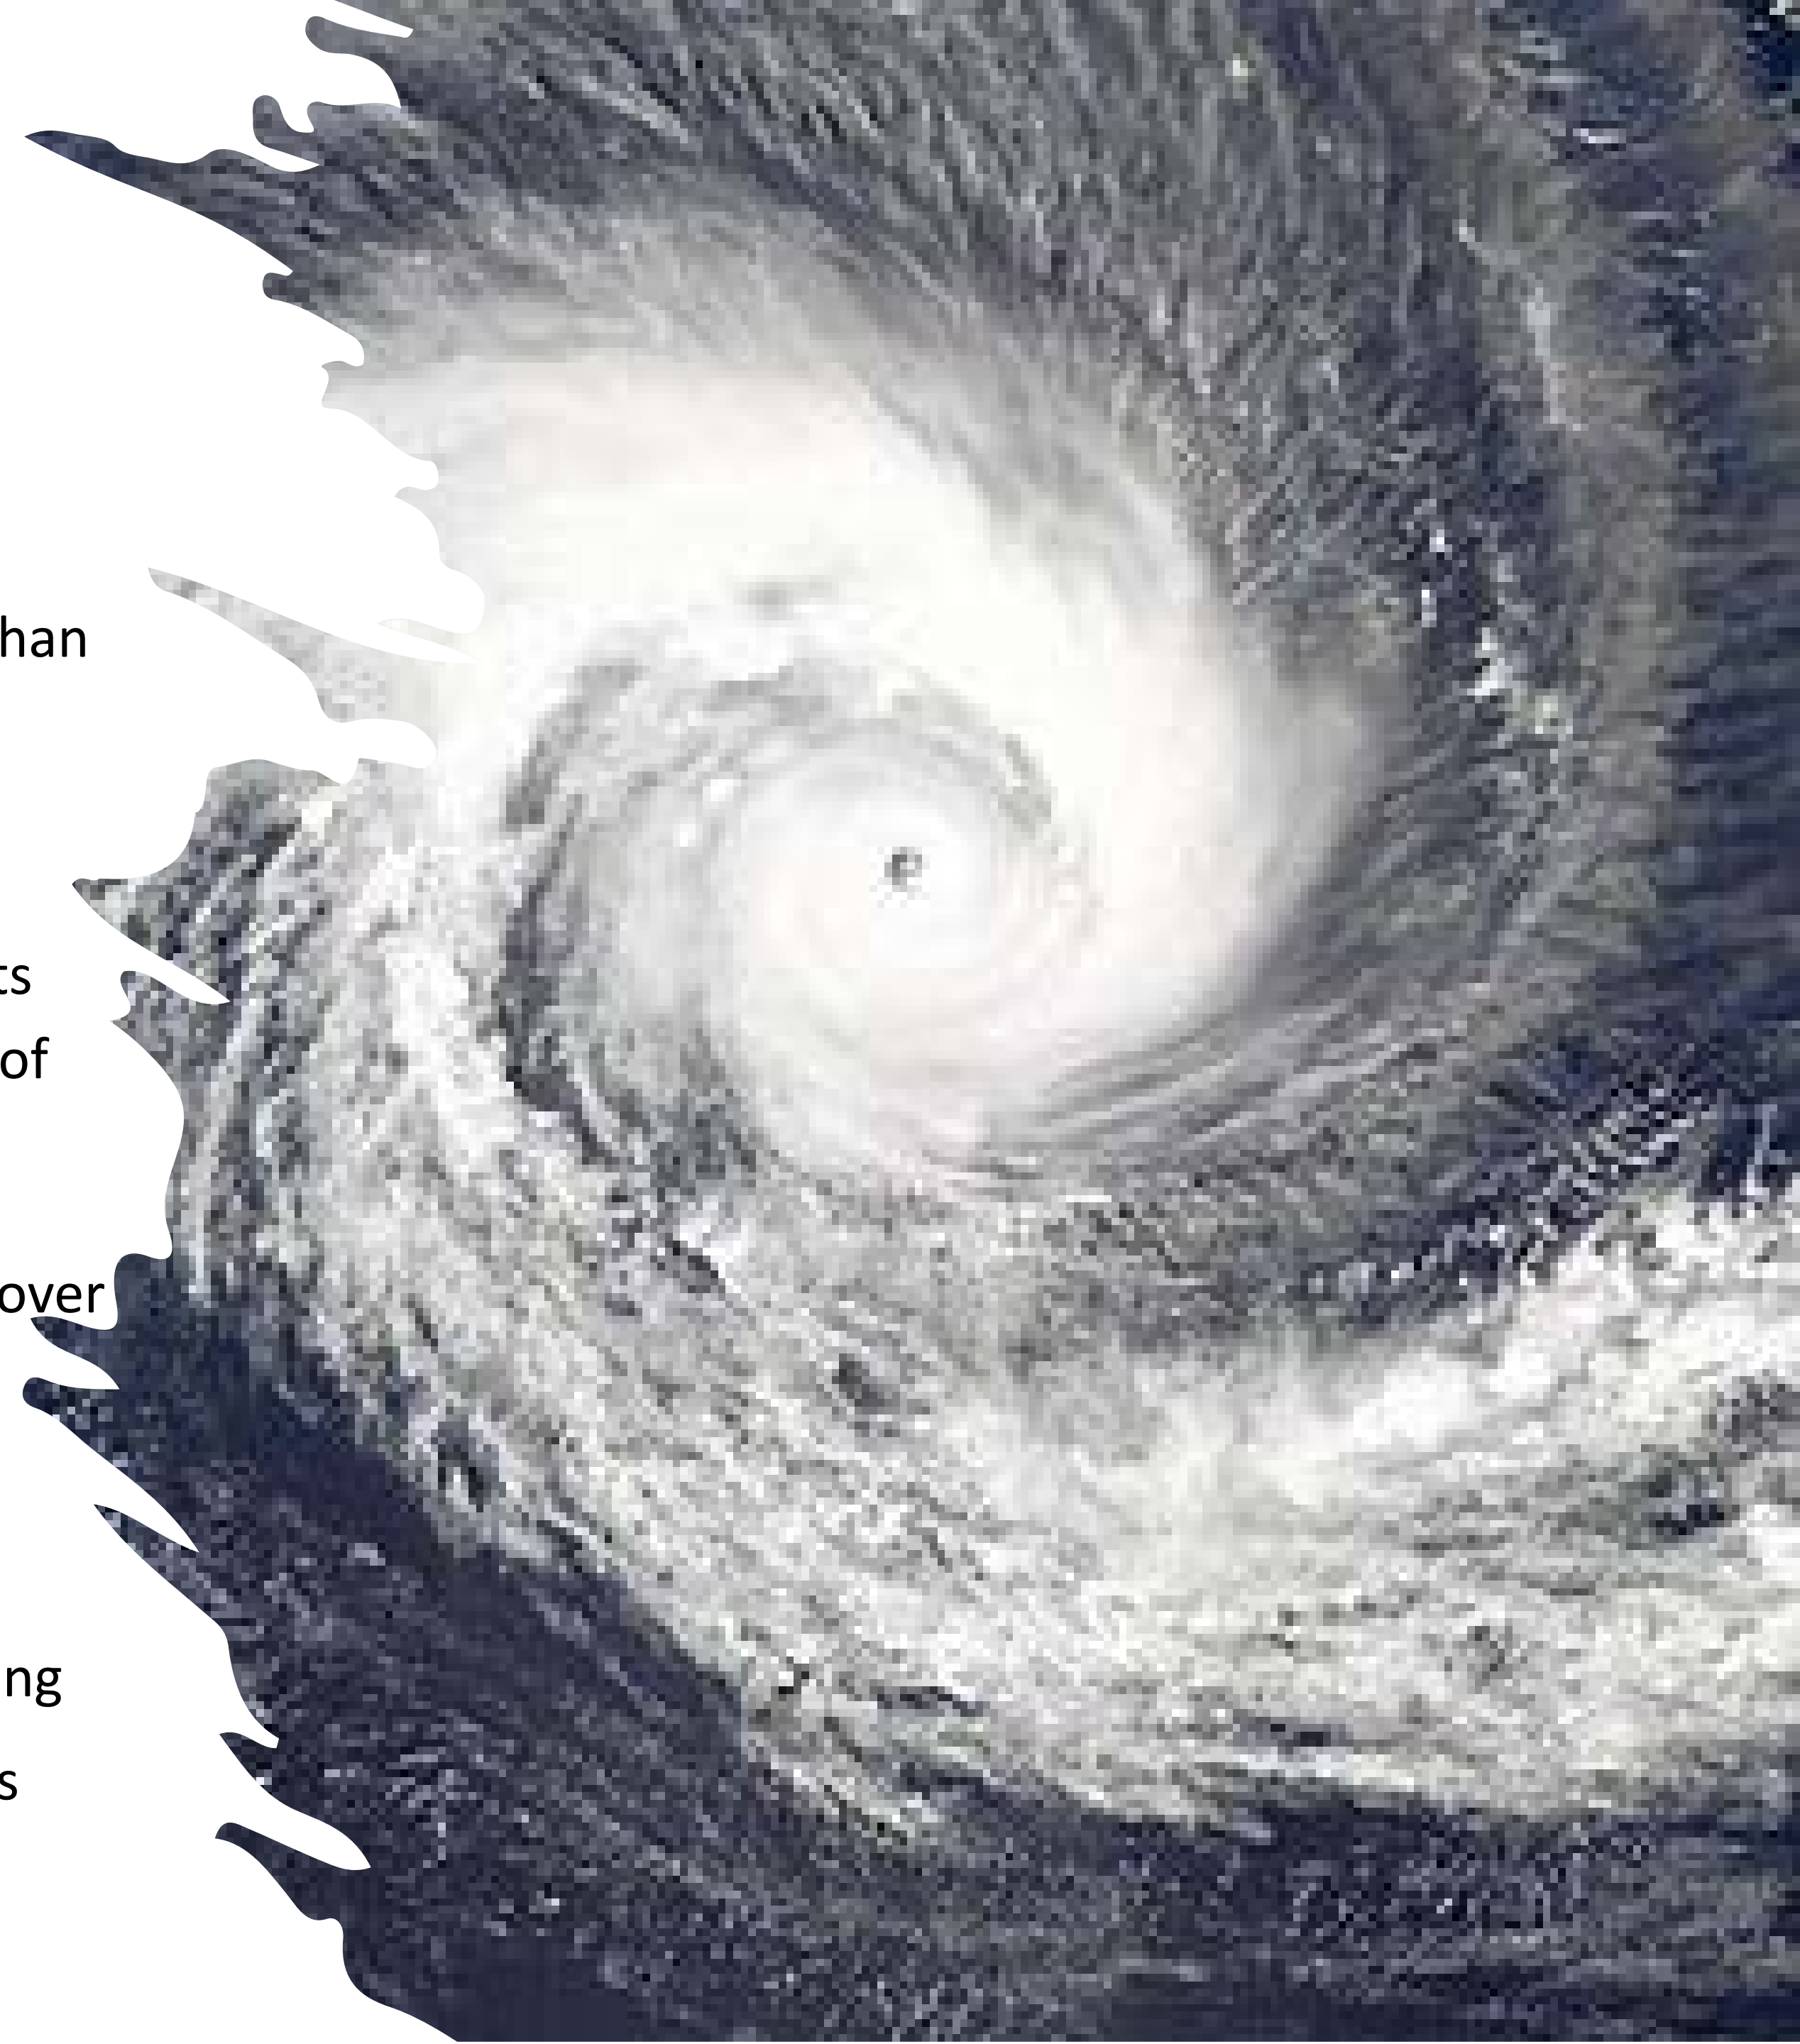

IPCC Reports in the Sixth Assessment Cycle

Recap of the webinar on the IPCC AR 6 WG I – The Physical Science Basis

- Warming is unprecedented in more than 2000 years and temperature levels (1.1°C rise) are unprecedented in more than 100'000 years
- *“It is unequivocal that human influence has warmed the atmosphere, ocean and land”* ~ 98% of global warming
- No region is spared by climate change and its extreme events
 - Virtually certain for increased frequency and intensity of hot events
 - Marine heat waves
 - Frequency and intensity of heavy precipitation events over most land area increased
 - Increase in agricultural and ecological drought across drought
- Increasingly we witness compound events: Concurrent heatwaves and droughts, fire weather and compound flooding
- Window for action is rapidly closing: Even a world at 1.5° C is not safe, but it is the best option we have.

Prof. Dr. Christian Huggel, University of Zurich

- Head of unit at Department for Geography
- Lead author of IPCC AR 5 and AR 6
- Research interests:
 - Climate impacts, risks and adaptation to climate change in mountain areas
 - Strengthening the intersection of science and international climate policy
 - Regional focus: Andes, Alps and Himalayas

Dr. Carolina Adler, Mountain Research Initiative

- Lead author of SROCC and IPCC AR 6
- Research interests:
 - Linking climate change adaptation and policies for sustainable development
 - Transdisciplinary research
 - Use and uptake of scientific evidence in policy- and decision-making

Dr. Veruska Muccione

University of Zurich

- Senior scientist at Department of Geography
- Astrophysicist
- Research interests:
 - Climate change impacts, risk and vulnerability
 - Global change and biodiversity
 - Integrated risk assessments

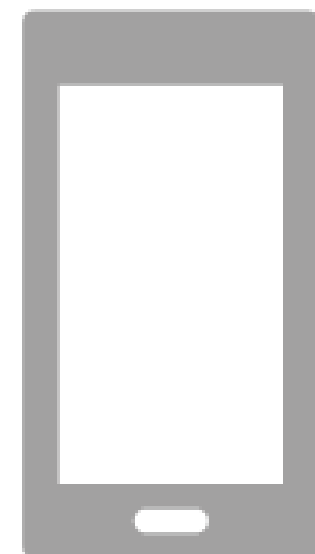

Q&A

- Post your questions in the chat box

Your take-aways from today

Go to www.menti.com and use the code **9431 0334**

How did the report's findings challenge your current practice?

 Mentimeter

Urgency is even bigger than thought.

Bridging the gap between science and practice remains a constant challenge

it gave a certain new perspective

Partially

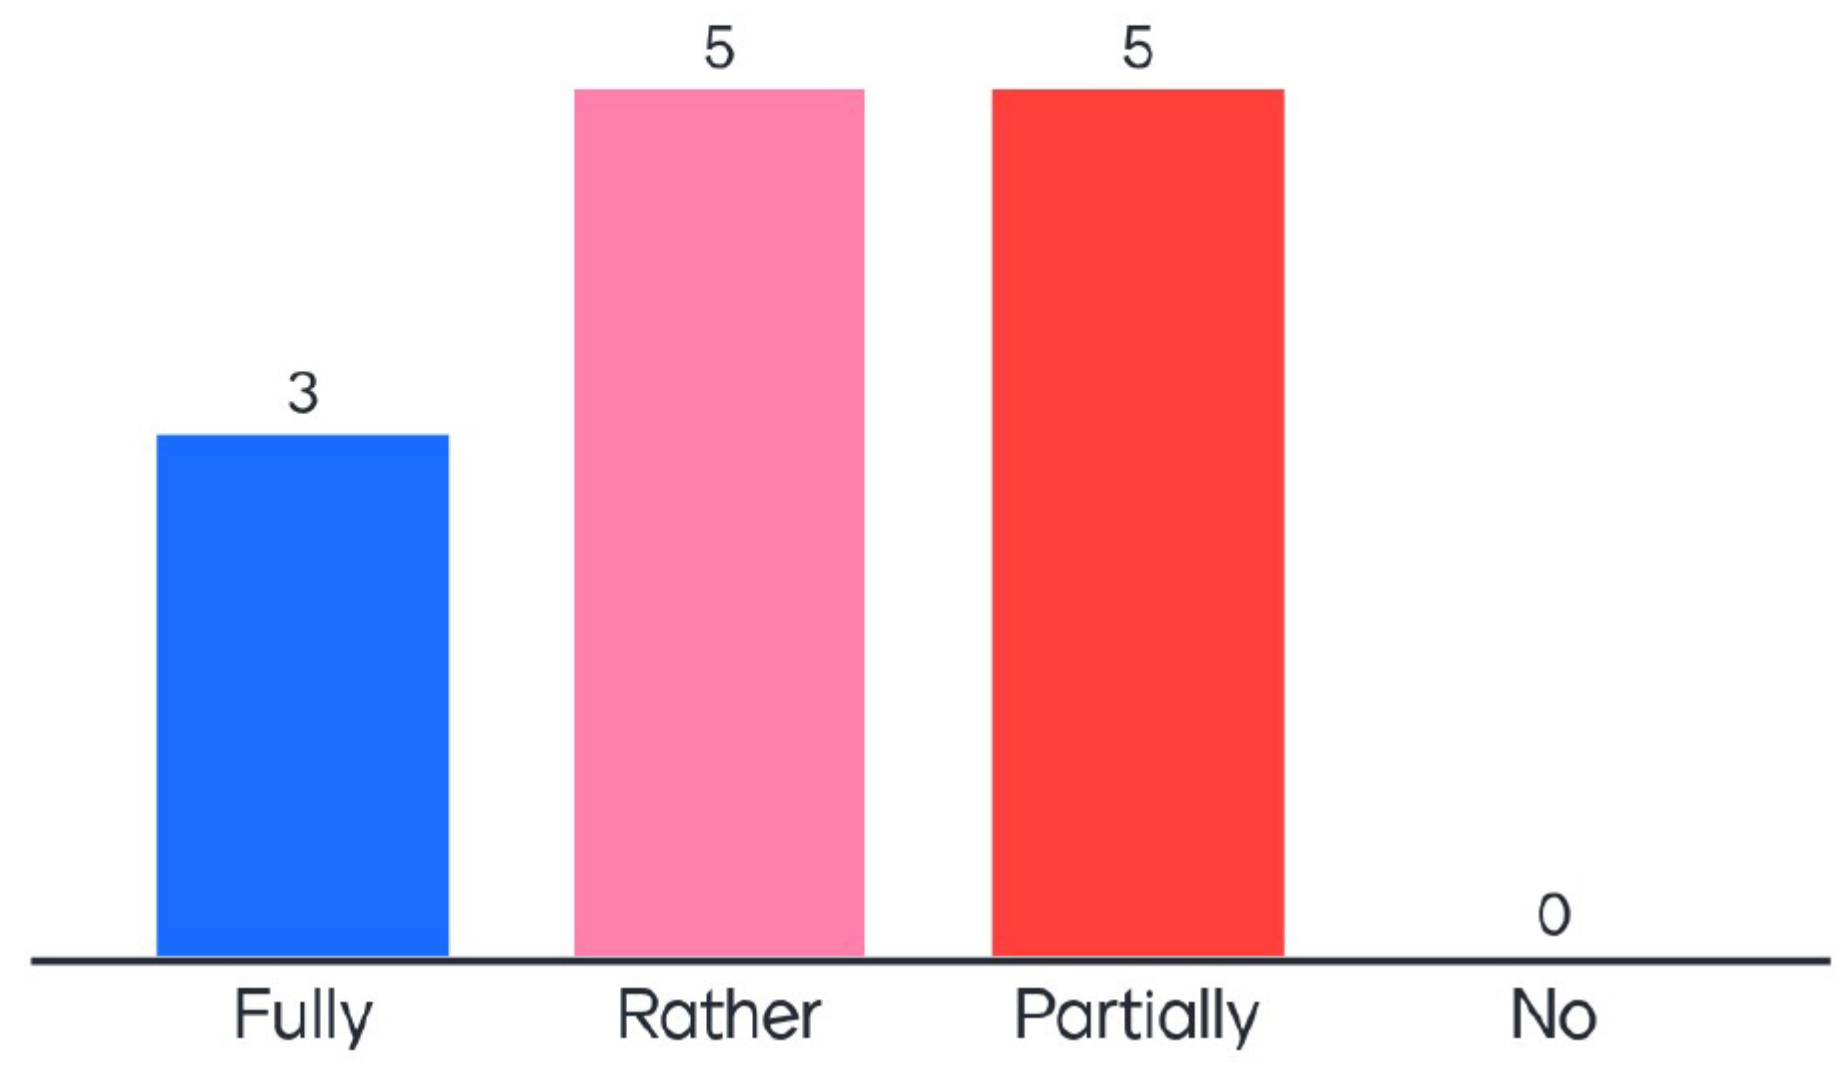

What are the biggest challenges to act, what support would you need?

 Mentimeter

financial support would help bring this initiative into light

Maybe coming with concrete suggestions as a sustainable solution

Did the webinar correspond to your expectations?

Do you have suggestions for improvement?

Shorter presentations, more questions

Improve technical support :-)

Let's hear some voices from the Global South

More interactive sessions

What's next?
