

## Workshop Programme and Preparatory Tasks

### Preparatory Tasks

#### Abstracts of methodologies, approaches and case studies

Please read the abstracts of the methodologies, approaches and case studies that we will discuss in breakout groups. This will help you make up your mind in which group you want to participate.

Here is the link to the [Overview of Abstracts](#)

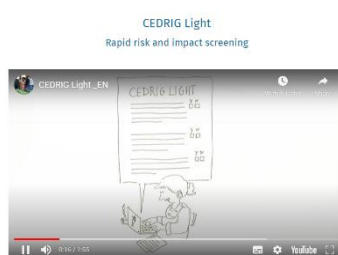

#### CEDRIG – Climate, Environment and Disaster Risk Reduction Integration Guidance

CEDRIG is the approach applied by the Swiss Agency for Development and Cooperation for mainstreaming DRR and CCA and increasingly by Swiss NGOs. It was one of the first and most comprehensive generic mainstreaming tool kit and serves really well as an introduction.

Please watch the following videos:

[\*\*CEDRIG Conceptual Background\*\*](#) (2:06)

[\*\*CEDRIG Light Rapid risk and impact screening\*\*](#) (1:55)

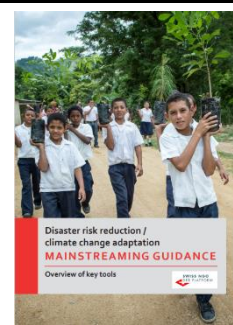

[\*\*CEDRIG Operational Detailed assessment and integration\*\*](#) (1:50)

Please also have a look at the [\*\*CEDRIG Light Guide\*\*](#) for a very good introduction to the stepwise approach of the screening.

#### DRR and CCA Mainstreaming Guidance

If you want to dig a little deeper, we recommend – in addition to CEDRIG – to have a look at the [\*\*DRR and CCA Mainstreaming Guidance\*\*](#) that we as Swiss NGO DRR Platform have produced a couple of years ago.
